

February 2017

Dear Parent,

Taking Control - Safer Internet

As many of you know, we try to ensure that our pupils and students are aware of how to operate safely online through guidance in ICT lessons and in regular assemblies on this theme.

We are in the process of arranging an information evening for parents on this topic but as today is internet safety day we thought it would be useful to share some resources with you in the hope that it not only better informs you but allows you to have conversations with your daughters on topics around the internet and social media.

The attached resources come from the Child Exploitation and Online Protection Agency (CEOP) who have a parents portal which can be found at www.thinkuknow.co.uk I am an ambassador for this organisation and so use these resources in my assemblies at school as well as delivering them at other schools and institutions.

I hope these prove useful to you

Best wishes

Mr Burke

A Message from the Internet Safety Team:

Welcome to the new academic year. Your child is about to embark upon an exciting new stage in their education and we are very much looking forward to working with and teaching them this year.

Having moved into a higher year group, they have been made aware that this will involve an increased level of learning, responsibility and participation. We will be calling upon them to undertake extra work at home, much of which will be internet based.

You will be aware the internet hosts many exciting opportunities for education. The online world is a wonderful place for young people to explore, with unprecedented opportunities for learning and creativity, but just like the real world there are risks and dangers they should be aware of and which we should all act to protect them from. As a school we encourage the use of technology as an important part of our students' development but always want them to spend their time online safely. As a parent/carer you can play a significant part in ensuring this.

Just a few simple steps by you can help keep them safe and give young people the awareness to know what to do if they feel uncomfortable about anything they encounter while on the internet.

If you do not wish for your child to be able to access any inappropriate content online, please ensure that their computers, laptops and other devices with internet access are all fitted with parental controls.

You can find free downloadable versions online or you can contact your internet service provider (such as BT, Talk Talk, Sky) for more information.

As a **minimum**, please set parental controls on your search engines, youtube account and the mobile phone your child uses.

One of the most popular search engines in the world is Google. You can visit Google's informative safety centre for **simple** step by step guides - www.google.com/familysafety/tools

Here are a few options available to you; they truly are simple to set, promise.

Visit the Google home page – www.google.co.uk and click on the 'search setting' tab in the top right hand corner.

Scroll down the page and change the filtering options to suit your family's needs. Make sure you lock the safe search; otherwise these settings can easily be changed without your knowledge.

SafeSearch Filtering

[Google's SafeSearch](#) blocks web pages containing explicit sexual content from appearing in search results.

- Use strict filtering (Filter both explicit text and explicit images)
- Use moderate filtering (Filter explicit images only - default behavior)
- Do not filter my search results

[Lock SafeSearch](#) This will apply strict filtering to all searches from this computer using Internet Explorer. [Learn more](#)

You can also set this on your child's smart phone;

SafeSearch on your phone

SafeSearch is accessible on your mobile device by using the browser to access the Google homepage. Choose settings located at the bottom of the screen and you'll see the option to select Strict, Moderate or to turn SafeSearch off completely.

Please be aware that no filter is 100% accurate. CEOP advice that you talk to your child about the sites they use. Why don't you discuss:

- Their favourite online sites
- What they enjoy most, the fun aspects of being online?
- What they think can go wrong?
- How would they react if things got out of control?

Let them know that you understand that situations happen online and that seeing 'adult' material can make them feel uncomfortable. Make sure they know that you are there to help.

Visit The Child Exploitation and Online Protection Centre (CEOP) parents' information website for more information - www.thinkuknow.co.uk/parents

Look out for CEOP's future parent and carers updates. Next addition – Christmas wish lists – Safety made easy.
